ABOUT INSTITUTION

An institution of excellence was established in 2005 by an educationalist and visionary Dr. P. Rajeshwar Reddy, M.Sc, Ph.D. The new venture was started to prepare the right professionals as ready to take the responsibility in the Pharmaceutical industry. The institute has been recognized by AICTE, PCI and NBA accredited. The institute runs B Pharm, M.Pharm and Pharm D courses. The main objective is to compete with global challenges in Pharmaceutical Profession. He is chairman, consortium of engineering college's management association (CECMA) of Telangana. He is member academic senate, Osmania University. Dr Palla Rajeshwar Reddy is an MLC and Whip, Legislative Council, Govt. of Telangana.

Department of Pharmacy

The Department of Pharmacy is a place where commitment to excellence in academia, research and development is demonstrated through productivity and success of our faculty and students. We offer a training environment that includes cutting edge laboratory instruments and technologies. The department initiated the research activities in the field of phytomedicine which include plant based products as excipients for delivering different delivery systems, herbal pharmaceuticals and their standardization, isolation and characterization of novel phytomolecules and method developments for herbals.

The Pharmacy Department is well equipped with good infrastructure, sophisticated instruments (UFLC, FTIR, Probe sonicator, Rota Evaporator, Freeze Dryer, Brookfield viscometer and Cooling centrifuge), for design, characterization of variety of novel herbal formulation. Furthermore the department has Animal house and Medicinal garden with 73 different plant species to carry research with effective outcomes. Anurag Group of Institutions, Department of Pharmacy was ranked in the All India 76-100 Band ranking by NIRF.

OBJECTIVE

The phytomedicines are in use throughout the world as an integral part of our health care system. The knowledge of traditional therapies is highly deep-rooted and time tested. A paradigm shift in the natural way of treatment has been observed, singling the outstanding future of phytomedicines. To get more significant results, phytopharmacological screening coupled with phytochemical studies in the light of modern technologies is much needed.

The Proposed FDP "Advances in Phytomedicine" will educate the faculty and research scholars on standardization of herbals as well as formulations, scientific validation of herbal and traditional medicine, isolation and characterization of phytomolecules, validation of biological activities and herbal formulations. Moreover this FDP is especially designed for faculty and research scholars to enhance their practical skills, instruments handling by demonstration and hands on training sessions.
